A
dual sequence: … o s a o s a … (behavior-only models see the same stream without the state row)
perception o
g g g z j W W k k B Y 2 2 2 1 1 0
state s
ν ν ν σ σ σ σ σ σ σ σ η η η η η δ
action a
F F F R F R L L F L T r r l f f D
arrives at empty remembered site (z)
finds poor food (Y) and takes it
unloads at nest
B
κ
scan (K)
2 steps
ε
explore (CRW)
senses trail →
← loses trail
φ
follow trail
lost > 2 steps →
← back on trail
υ
U-turn (U)
forgets memory after 60 steps
goal behind (j)
ν
vector navigation
reaches z
σ
systematic search
added from the literature:
food-site vector (Bolek et al.)
systematic search (Merkle et al.)
no memory
has memory
takes food (from any outbound state)
δ
unload (D)
at nest
η
carry home, mark
